EDUCATION

Hacettepe University

Ankara, TR

Computer Engineering (English) — Third-year Student | 2023 – Present

Şehit İbrahim Armut Science High School

06/2023

Graduated 2nd in School • YKS Success Ranking: 2832 • GPA: 95.28/100

EXPERIENCE

Zemrek — E-Commerce Platform (VBT Software Development Internship)

2026 • 6 Weeks (30 Workdays)

Project Manager & Backend Developer • 4-person team

- Acted as Project Manager and backend developer for "Zemrek," a full-stack e-commerce platform for luxury watch collections, coordinating a 4-person team across backend, frontend, and mobile.
- Implemented core backend resources (product, cart, order, user) with NestJS, Prisma, and PostgreSQL, containerized via Docker Compose.
- Managed the backlog through GitHub Projects, defined the team's Definition of Done, and ran daily stand-ups.

E-commerce Enterprise (Etsy & Printify)

12/2023 – 07/2024

Founder / Operations Manager • Ankara / Remote

- Managed an international Print-on-Demand (POD) business, integrating Etsy with Printify via API to automate global supply chain workflows.
- Optimized storefront performance through SEO and trend analysis, successfully generating 118 international sales.

PROJECTS & COMPETITIONS

Linkiva — Bio-Link & Analytics Platform

2026

- Built a bio-link platform with Next.js, TypeScript, Tailwind CSS, and a Supabase/Prisma backend, exploring auth (OAuth) and analytics features.

GitHub: github.com/Serdarsahinn05/Linkiva

Live: linkiva.space

Claudiva — Multi-Agent Claude Code Panel

2026

- Built a TypeScript control panel for running, monitoring, and coordinating multiple Claude Code agents within a single project, distributed as an npx-installable CLI tool.

GitHub: github.com/Serdarsahinn05/claudiva

npm: www.npmjs.com/package/claudiva

PazarLab AI — Synthetic Consumer Simulation

BTK'26 Hackathon

- Developed a Python-based AI simulation of synthetic consumers to analyze sales potential, target audience, and marketing strategy for e-commerce products.
